STRATEGIC PLANNING

Our team has performed market research, competitive analysis, and strategic roadmap development for top automotive and connectivity companies seeking to take advantage of vehicle technology developments. We can help develop meaningful insights and actionable plans that will put your company on the path to success in the rapidly developing market surrounding autonomous vehicles.

POLICY GUIDANCE

Our team not only includes legal experts well-versed in the latest autonomous vehicle developments, but our entire team has also spent years working within the regulatory frameworks for connected vehicles and IoT devices. We can help you understand the increasingly complex laws, regulations, and issued guidance surrounding autonomous vehicle development, deployment, and adoption.

MOBILITY INTEGRATION

We can help your team develop comprehensive plans to take advantage of integrations between smart/autonomous vehicles and the increasing variety of alternate transportation options. From app prototype development to back-end data integrations to partner setup and management, our consultants have the experience and know-how to help you seize the business opportunities afforded by mobility changes.
